Dear colleagues,

As we were asked to make the final report more detailed, I would like to ask you to send me a list of the activities by which you supported the dissemination of the project, if you did anything like that. I don't mean pilot testing, local workshops or small scale meetings, but if you did any presentations of the project, any additional workshop and so on. Please use the table below, for every single action use one table (just copy it below).

Also I would appreciate getting any promotional materials, publicity, articles in newspapers, magazines, professional websites and so on if you created any.

Another thing I would like to ask you for is to check your project websites. It must be updated! Especially now there must be the information the project already ended. The information that should be also mentioned there are: goals of the project, outputs, activities, EU logo. You can inspire yourself from the text that will be published on Linet website (please see the att.). Once you will check this is done please send me the link.

The table for the dissemination activities:
name of the team:

name of the action:

date:

place

approximate number of participants:

how you presented the project:
